Address & APN (attach map) \_\_\_\_\_

Purpose of Water Use \_\_\_\_\_

Daily Usage in Gallons \_\_\_\_\_ Is recycled water located on site? \_\_\_\_\_

Requested Meter Location \_\_\_\_\_

Start Date \_\_\_\_\_ Stop Date \_\_\_\_\_

### ***THE APPLICANT'S USE OF A TEMPORARY METER IS CONDITIONAL UPON THE FOLLOWING TERMS:***

1. Payment of a standard initial meter deposit with a subsequent refund less the final billing amount, costs incurred by NWC to test, rehabilitate, and restore the meter to a condition that meets NWC's standards for accuracy. The Applicant is responsible for the meter and will be required to pay all costs associated with replacing a lost or stolen meter.
2. Daily rental fee for the use of the meter shall apply.
3. A meter relocation fee shall apply each time NWC is instructed to relocate the meter and will only take place during normal business hours. All relocations must be approved by NWC in advance and may be subject to backflow testing.
4. The Applicant is responsible for the payment of any and all damages to NWC's facilities resulting from their connection to, use of, or disconnection from the meter and fire hydrant assembly.
5. Forfeiture of meter deposit if the meter's chain and or/lock are damaged in any way for any reason, unless the damage occurs as a result of NWC's relocation, testing, rehabilitation, or restoring of the meter.
6. All equipment is subject to inspection and approval by NWC prior to use. No hard piping allowed or hose with a length greater than 50 feet (hose must be inspected by NWC).

- 
7. Any water deliveries through non-approved equipment will be cause for discontinuation of service without prior notice by NWC.
  8. A limit of twenty-four (24) consecutive months for use of a meter on any one project.
  9. Applicant must have a USC-approved backflow prevention device available for installation at the time the meter is placed on the hydrant. Inspection and testing must be performed by an NWC contracted tester before the hydrant meter can be activated. Upon approval by NWC, with a valid reason, you may be permitted to use an air gap in lieu of a backflow prevention device. The request must be submitted to NWC for consideration.
  10. If recycled water is located on the property, the site must meet State Water Resources Control Board (SWRCB) cross-connection control requirements.
  11. The Applicant agrees to use the meter in a way that will not create a threat to public safety or property.
  12. Indemnification of NWC from any and all responsibility for liability, property damage, and/or personal injuries which may result from the Applicant's use of the meter and/or fire hydrant. Such indemnification shall include legal costs incurred by NWC.
  13. In the event of interruption of our water supply within NWC's distribution system, delivery of water could halt without prior notification.
  14. Acknowledgement that the meter shall not leave the NWC boundaries.
  15. Water cannot be used outside of district boundaries or resold unless otherwise approved by NWC.
  16. Rates are subject to change without prior notification.
  17. The Applicant agrees to notify Nuevo Water Company (NWC) at least 48 hours in advance of any increase or decrease in water use that exceeds \_\_\_\_\_ gallons per minute (GPM) from the originally stated usage. Failure to provide adequate notice may result in suspension of service or additional charges.

### **CERTIFICATION AND ACKNOWLEDGEMENT**

By signing below, the Applicant certifies that all information provided in this application is true and correct to the best of their knowledge. The undersigned further affirms that they are authorized to execute this application on behalf of the company or agency requesting the hydrant meter and to bind said entity to the terms and conditions set forth herein. The Applicant further understands and agrees to the following:

- The use of a temporary hydrant meter shall not pose a threat to public safety or private property.
- The Applicant accepts full responsibility for any and all activities associated with the use of the hydrant meter, including any damages to property, infrastructure, or NWC facilities. In addition to any non-compliant cross-connection issues or events.

- 
- The Applicant shall indemnify, defend, and hold harmless Nuevo Water Company (NWC), its officers, employees, and agents from and against any and all claims, losses, damages, liabilities, costs, or expenses (including attorney's fees) arising out of or related to the Applicant's use of the hydrant meter and/or water from NWC's system.
  - NWC shall not be held liable for any injury, loss or damage resulting from the use or misuse of water accessed through the hydrant meter, including in cases of service interruption.
  - The Applicant acknowledges and agrees that water use under this permit is secondary to the operational demands of the Fire Department and NWC. Service is subject to restriction, reduction or suspension at any time based on water system capacity, emergency conditions or operational priorities, or as required by NWC's Water Shortage Contingency Plan.
  - The Applicant acknowledges full understanding of and compliance with NWC's requirements for temporary fire hydrant use.

Authorized Representative Name (Print) \_\_\_\_\_

Title \_\_\_\_\_

Company / Agency Name \_\_\_\_\_

Signature \_\_\_\_\_

Date \_\_\_\_\_ Phone \_\_\_\_\_

Please provide the contact details of the person(s) responsible for overseeing the on-site water use:

### Hydrant Meter Relocation Details

Date	Location	Backflow Test Complete	
_____	_____	<input type="checkbox"/> Yes	<input type="checkbox"/> No
_____	_____	<input type="checkbox"/> Yes	<input type="checkbox"/> No
_____	_____	<input type="checkbox"/> Yes	<input type="checkbox"/> No

As you proceed with your work involving the use of the fire hydrant, we kindly ask that your team take extra care to:

1. Open and close the hydrant slowly – This is critical to prevent the occurrence of water hammer, which can cause pressure surges in the water system. Sudden changes in pressure can stir up sediment in the water mains leading to discolored water for nearby customers.
2. Minimize disruption to nearby water customers – Controlled operation helps maintain water quality and avoids unnecessary complaints or service interruptions.
3. Be mindful of traffic and public safety – Ensure appropriate signage and safety measures are in place to protect both your crew and the public in areas with vehicle or pedestrian traffic.

Thank you for your attention to these important matters. If you have any questions or need further guidance, please don't hesitate to reach out to the Assistant Operations Manager Mike Leyva at 951-347-4773.
